

WHAT HAVE TOILETS GOT TO DO WITH CLIMATE CHANGE?

Flood, drought and rising sea levels threaten sanitation systems – from toilets to septic tanks to treatment plants. Everyone must have sustainable sanitation that can withstand climate change and keep communities healthy and functioning.

#WorldToiletDay

HOW DO TOILETS PROTECT OUR HEALTH?

Sustainable sanitation is resilient to climate change and safely processes bodily waste. Toilets, combined with clean water and good hygiene, form a strong defence against #COVID19 and future disease outbreaks.

#WorldToiletDay

HOW CAN TOILETS HELP FIGHT CLIMATE CHANGE?

Wastewater and sludge from toilets contain valuable water, nutrients and energy. Sustainable sanitation systems make productive use of waste to safely boost agriculture and also reduce and capture emissions for greener energy.
